

Affordable and First Time Buyer Housing for Local People

Do you want to down size but still live locally? Would you like to stay in your village ?

We are carrying out research about the needs of local people.

Would you be interested in freeing some of your money up by selling your property and moving into a quality affordable house?

Are you retired and want to down size but want to remain local?

We are proposing to build 27 houses in Grimsargh. 4 of these would be two bedroom bungalows specifically for over 65's. There would also be 14 two bedroom semi-detached houses with the facility to convert the attics into another bedroom and 9 three bedroom terraced houses.

The conditions to buy a house would be that you or your family must live or work or have lived in the local area.

We attach plans of the proposed site layout and of the dwellings, for your perusal.

We would like your views please.

Yes I am interested in the proposed development and would like some further information about the proposals.
